NEW-YORK TRIBUNE.

NEW YORK, THURSDAY, MAY 10.

See to-day a Supplement for a startling erpose of actual life in France, with its application and parallel in the City of New York. Everybody should read it.

THOMAS EWBANK, Esq. of this City, well known by his great work on 'Hydraulies,' and by others of evincing profound research, has been ap. pointed Commissioner of Patents by the President. In this selection our preference has not been gratified, but an admirably qualified officer has been secured for a most important and responsible station. We do not believe a better Commissioner of Patents, as such, could have been found; but we wanted also an able politician and compiler of Statistics bearing on the Public Policy of the country, and this Mr. Ewbank has yet to prove himself. The Whig party has had a rabid and dexterous adversary in that post for some years past; we thought it had a fair claim to an effective supporter in the same place, now that the wheel has revolved-a right to a good Commissioner and something more. These considerations have been disregarded in the selection of Mr. Ewbank, who is only known thus far as a master of the history and philosophy of Invention. Apart from politics, his appointment must give very general satisfaction.

The Next Congress.

The Pennsylvanian and Boston Atlas comment on our recent exhibit of the probable strength of parties respectively in the next Congress, the former considering that exhibit too favorable to the Whigs; the latter regarding it as conceding too much against them. The Atlas thinks we were wrong in classing Messre Mann, of Mass. and Wilson and Tuck, of N. H. as 'Free Soil Whige, as it is confident of their voting with the Whigs throughout: while it does not agree that Mr. Palfrey will be chosen to complete the Maseachquetts delegation. On all these points we adhere to our former position. Mesers. Mann and Tuck are preeminently for Free Soil, though they prefer Whig to Loco-Foco ascendancy, and will so vote whenever that choice is presented. Gen Wilson is primarily a Whig, but elected under circumstances which impel him to make Free Soil his polar star. We believe this is the fact likewise with regard to Messrs. Howe of Pennsylvania and Sprague of Michigan. Messra Giddings and Root of Ohio were Whigs, they are now Free Soilers, with what lat ent tendencies re mains to be seen. We presume all we have named would ultimately vote to reelect Mr. Winthrop Speaker, when the choice shall be narrowed down to him or a Loco-Foco, except Messrs. Palfrey, Giddings and Root, and we are not sure about the last named. But we placed in the Tay lor column those, and those only, who would probably vote first and thenceforward for Mr. Win throp. We think, therefore, that our table is more instructive than that of the Atlas, which follow the Journal of Commerce in dividing all the Members elect between the two great parties, making 90 Whigs and 75 Loco Focus. This table puts in the Whig column Mr. Charles Durkee o Wisconsie, an early and ardent Abolitionist, elected as a Free Soiler, and now absorbed into Luca-Fogoism by the Wisconsin Coulition. There is no sense in calling him a Whig, nor is there much wisdom in jumbling in Root, Giddings and Charles Allen with the friends of the New Administration.

which they bitterly oppose. -The Pennsylvanian, on the other hand, terms our exhibit "most reckless," "Whig despera tion," and all that. Why so ? It says :

"In order to build up its extraordinary calculation it is compelled to take Isaac E. Holmes, of South Caro-lina, a Taylor Democrat a year ago, into the White columnt. Mr. Holmes is an ultra Democrat, and will go with his old party from the jump.

Mr. Holmes is a scion of the old Federal Aris theracy of South Carolina, and if any man we know is farther than all others from being a Demo crat, Isaac E. Holmes is that man. We say no this to his disparagement, for he has many good points. He is on some questions a Whig, on others a Loco-Foco, but on none a Democrat, and would seorn to affect the character. For everything approaching Democracy, he has an open and pro found abhorrence. It is quite probable that he will vote oftener against the Whig party than with it, but he voted for Mr. Winthrop, was elected as a Taylor man, and is still friendly to the President of his choice. Yet he is styled by the Pennsylvanian "an out-and-outer on all Demo cratic questions." And it proceeds to estimate as

"We have no doubt the Democrats will gain in the States yet to elect, as follows: two in Indiana, one in Mississippi, one in Alabama, one in Maryland, one in North Carolina, and may love one in Achtuck

Perhaps so. We shall see -The sum and substance of the whole matter is that the House is rendered dubious by the extraordinary results of the Connecticut and Virginia Elections, and that one or two more such would demolish the Whig majority and perhaps give as adverse Speaker. That is the truth, and the Pena sylvanian can make little by exaggerating it

INDIANA .- JOHN A. MATSON of Franklin [County has been nominated for Governor by the second) Whig State Convention, in place of Judge Embree, whom his constituents require for Con gress. Mr. Matson was recently the Whig can-didate for Congress in his District, and is a worthy citizen. The several State Tickets are now com pleted as follows :

Van Park San Lary For German John A Marson , For Li German , F We apprehend that the result of this triangular contest will be similar to that for President last year, when Indiana voted-

Taylor 63,907 Van Buren 5100 Cass 74,745 Cass over Taylor 4,838 T and V B over C 3,300 This ought to be averted, and might be. Mr. Cravens was formerly a good Whig : Mr. Matson, we are confident, is stanch for Free Soil. There ought to be some sort of understanding that would save the State from the rule of the Cass minority. and we do not yet despair of it.

Terrific tiale on Lake Erie-Fatal Accident on the Steamer Louisiana

Correspondence of The Tribine.
STEAM-PICKET MICHIGAN, LAKE EARR, May 6, 1832.
In consequence of a heavy north-wester, the steam packet Louisiana, bound for Buffalo on her return trip from Chicago, put in at Fairport, where she was soon joined by the Southerner. Oregon and Michigan, but without any material injury to either. This morning, on the abatement of the storm of both wind and rain, the Louisians, with about two hundred passengers—a large proportion of whom belonged to the cabin—and a heavy freight, put out on her way and was soon followed by the others, except the Michigan, which preceded her. When about four hours are soon followed by the others, tweet the michigan, which preceded her. When about four hours out a steam pupe exploded, the steam escaping into the furnace, and thence, together with the fire, upon five firemen, all of whom were horribly upon five firemen, all of whom were horribly scalded, three of them surviving but a few hours. The change of scene from the quictude and cheerfulness which had before prevailed can only be imagined by those who have witnessed like cal lamities. Such horrible agony as that of the five sufferers I had never before the opportunity of witnessing in all my experience with suffering humanity, and trust I may never again.

To Capt. Stewart of the Michigan, much praise is due for his prompt efforts to render us relief

The Institution for the Blind.

The Eighteenth Anniversary of this noble Charry was celebrated yesteriay afternoon at the Tabernacle. The bunding was densely filled—the immense audience standing in all the aisless throughout the galferies, and about the doors, while many were compelled to depart altogether. When we emisred, a for they had ample time to say of distress before the Michigan, much praise is due for his prompt efforts to render us reined. Although some distance abead he immediately put his boat about and came along side, while the Oregon, Capt. Chapman, and the Scutterner, Capt. Edmonds, both went by without offering assistance, although the last crossed close on our stern. What apology can be offered for such an act of apparent inhumanity we cannot conceive, for they had ample time to sould get to us, or we of the depart altogener. When we entered a lab were visinly striving for admittance—but the of the building was already overtised. We to more such substantial takens of universal in noble institutions like this, for the relief of Humanity. they have the deepest sympathy, as well as the
